

# MATCHED MANAGEMENT TAGS FOR VICTORIAN PRODUCERS

## CUSTOMER UPDATE

From April 1, 2021 the option to order matched management tags on the Agriculture Victoria website, unfortunately will no longer be available. If Victorian producers would still like to have an Allflex matched management option on farm, there are a few steps to take to facilitate this.

### PRODUCER (FARMER)

When the producer places their NLIS Electronic Cattle Tag order with Agriculture Victoria, they will need to nominate to have their tags packed on sticks rather than loose in the bag.

### RURAL RETAILER

When placing an order on behalf of a Producer, the Rural Retailer will need to clearly state that the Visual Management Tags are to be part of a matched management set for a Victorian producer who has recently purchased their NLIS tags through Agriculture Victoria.

This will allow Allflex to liaise with the Rural Retailer and provide the relevant number series to be printed on the Visual Management Tags so that they correspond with the NLIS Electronic Cattle Tags. To do this, Allflex will require the Rural Retailer to provide the producers PIC.

Cattle NLIS tags on stick

Matched Management

Matched Management with TSU

It is important to note that NLIS Electronic Cattle Tags and Visual Management Tags will not be freighted together. However, we will be able to provide the Visual Management Tags on a matched set tray, to allow the tags to be paired more easily on farm.
