

The logo for Allflex Livestock Intelligence, featuring the word "Allflex" in a stylized blue font with a white outline, and "Livestock Intelligence" in a smaller, plain blue font below it.

Livestock Intelligence

Allflex Livestock Intelligence **PULSATORS**

Allflex Livestock Intelligence pulsators provide highly reliable operation. With their streamlined design, they are easy to install, and almost maintenance-free. Incorporating over 35 years of extensive field research, Allflex pulsators are installed in tens of thousands of milking points around the world.

Simple mechanical design ensures reliable operation

Allflex pulsators are highly reliable, even when operating in dusty environments. With just two moving parts, no membranes and no small parts, they require only minimal maintenance or repairs, with no need for tools or special expertise.

Easy installation and replacement

The Allflex pulsators' streamlined design makes them easy to install, monitor, and replace, even during milking. The Allflex pulsator is connected to the vacuum line with a stall cock that enables quick and easy on-the-fly assembly or replacement. Ventilation can be run through individual filters or a central free-air pipe.

Vacuum monitoring gauge indicates real-time issues

built-in vacuum monitoring gauge monitors the pulsation and provides at-a-glance indication of a malfunction caused by cracked liner or a hole in the tube.

Allflex P500

Solenoids only for central pulsation system, 24 V DC

Allflex P700

Standalone pulsator, 16 configurable rate/ratio programs

Allflex P700S/SO

16 configurable rate/ratio programs with touch control for on/off pulsation (suitable for standalone milking points)
